push tag用于提交代码构建成功后push tag,以防提交代码报错,方便回滚之前正常的代码。

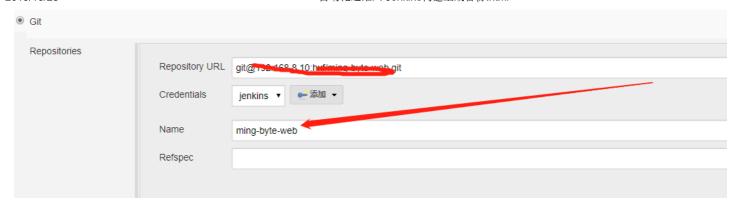

由于采用docker部署的形式,构建失败自动回滚还未实现,待研究解决。

构建后操作选择 Git Publisher

注意: 这里的Target remote name 为添加git时添加的name

push成功

```
+ ecno rimished:
finished!
using credential 26e43bbc-407f-42ff-8865-41496cf12fe9

> /usr/bin/git tag -l rc_13 # timeout=10

> /usr/bin/git tag -a -f -m 版本回退 rc_13 # timeout=10

Pushing tag rc_13 to repo ming byte web

> /usr/bin/git —version # timeout=10
using GIT_SSH to set credentials

> /usr/bin/git push git@192.168.8.10:hxf/ming-byte-web.git rc_13

Notifying upstream projects of job completion
Checking for post-build
Performing post-build step
```

Project MingByteWeb

需要如下参数用于构建项目:

开始构建
